

INDEX TO VOLUME 40 (Parts 1 and 2 published to date)

This index has been compiled by Pryce Buckle, and is similarly arranged in three parts: a taxonomic index, a general and geographic index, and an author index. It is designed to signpost users to the article they seek rather than to be a comprehensive index to every reference in the *Journal of Conchology*.

Page references are to the first page of the paper concerned, except for new taxa where the page reference gives the start of the formal description. Clicking on the page number ([blue underlined](#)) links you directly to the relevant Abstract. Some page numbers (standard black text) DO NOT contain links because they are communications or reports, not full papers, and so do not include Abstracts. Other links ([blue underlined](#)) will connect you to related information within the website.
